## Winter/Spring 2018

Dear Family and Friends,

This winter and spring we are continuing to push the boundaries of science, technology, engineering and math with our **STEM Central Winter/Spring Workshops**. Our non profit mission is to **EXCITE, EDUCATE and ENCOURAGE** your child to become the innovators of tomorrow.

This year we have added additional information to help you determine if a workshop is right for your child. e3 Robotics will be hosting our program this Winter/Spring at our new location at 1715 NC 68, Oak Ridge NC 27310 in the Family Center Building.

This year we will be introducing our Elevate Leadership program for older students ages 12-17. We also will be offering a Chess Competitive Team, as well as underwater robotics. Our goal is to have fun while learning. Finally we have created levels with workshops so that students who are interested in learning more can delve deeper once they have completed an introductory class.

Refer a friend to our program and receive \$10.00 off your next registration and they will receive \$10.00 off as well.

**For more information about registration please visit us at [www.e3robotics.us](http://www.e3robotics.us). Please feel free to contact me at 336-493-0403.**

We look forward to seeing you and your family this Winter/Spring!

*Maria*

501 (c) 3 Non-Profit

# Elevate Leadership

Elevate leadership development program integrates sophisticated content, youth development strategies, experiential learning, and opportunities to empower tomorrow's leaders. 21st Century Leadership skills empower young people with the inspiration, tools and resources to make a difference in their school or community—making a tangible impact on issues they're passionate about.

Our 21<sup>st</sup> Century Leadership program is designed to:

- Develop awareness of leadership styles and how to leverage strengths
- Explore decisive conflict resolution tactics
- Learn effective communication strategies
- Understand the power of social media and digital citizenship
- Amplify impact by learning how to mobilize peers to achieve common goals

**Character is how you treat those who can do nothing for you.**

## **All children have the potential to become leaders.**

### **Ambassador (12-17):**

First time participants who have never attended a previous Elevate Youth Leadership Program.

### **Alumni (13-17):**

Returning participants who have 1 Year of Elevate Leadership training and have the desire to further their leadership skills in addition to helping guide our first-time Ambassador participants. They have been recommended or nominated by their Team leader during the previous year.

### **Youth Leader (16-18):**

The highest level of applicants, Youth Leaders have participated for 2 or more years with our Elevate Leadership Training program as an Alumni. They have been recommended or nominated to the Youth Leader role by their Team Leader during the previous year.

**Date:** January 9 – December 15, 2018

**Time:** Tuesday or Thursday 6:00 – 8:00 PM

**Location:** 1715 NC 68 Oak Ridge

**Room:** 202

**Cost:** \$300.00 per year

### **Parent Information Meeting**

**Date:** November 18, 2017

**Time:** 10:00-11:30 am

**Location** 1715 NC 68, Oak Ridge

## Frequently Asked Summer Camp Questions

### Why are there lab fees for only certain classes?

When a lab fee is listed it is the fee for the materials that we are purchasing for students to take home. These types of materials we are hoping your child will continue to use at home or attend an advanced class so that they can learn even more.

### If my child is 10 or 13, 14 how do I choose the level of class for him/her?

The main difference between levels is degree of intensity of learning. The pace of instruction increases as students increase in age. So if you want them to try a class to see if they will like it place them in the workshop where they will be the oldest. If they love it and want to do more they can then move to a Level 2 workshop or Move to the next age group.

### How Do I Register for a Workshop?

Registrations may be submitted online, by mail or in person. Online registrations will take priority. Mailed and dropped off registration will be processed in the order they are received.

Registration Opens November. 1, 2017

48 hour advanced registration is required for ALL camps. There are a limited number of spaces (12 max). Register early to avoid disappointment. You may register in 3 ways:

1. **Online:** Register at [www.e3robotics.us](http://www.e3robotics.us). Online registrations will take priority over mailed or dropped off registrations.
2. **In Person:** Register in person Monday—Friday, 10:00 AM—5:00 PM, at our office located at 1715 NC 68 Oak Ridge, NC 27310. Cash, check or credit card accepted.
3. **By Mail:** Mail payment to e3 Robotics, PO Box 163 Oak Ridge, NC 27310

### Cancellation Policy

e3 Robotics makes every effort to not make changes to our schedule. However we reserve the right to cancel any workshop/team not meeting minimum enrollment, combine classes, and substitute faculty when necessary. Workshop/Team cancellations are announced 5 business days prior to start date.

### Refunds & Credits

Fees are refunded 100% if e3 Robotics cancels a camp due to insufficient enrollment. Registrant cancellations are 100% transferable into another workshop/credit or 50% refundable. All workshop cancellations must be made no later than 2 weeks prior to your registered workshop start date. NO REFUNDS or CREDIT VOUCHERS will be issued after this final cancellation period.

### Pick Up and Drop Off Location

Pick up and drop off will happen at your child's room unless they are 12 and older and have parental permission. Please send a note that states they are permitted to sign themselves in and out of the room

### Workshop/Team Guidelines

- Each student should bring a snack for each session. Snacks are not provided by e3 Robotics.
- To ensure a great experience for every child, e3 Robotics reserves the right to remove disruptive students. If a student is asked to leave, all fees will be forfeited for the entire workshop/team.
- Cell phones, card games and hand-held video games systems are prohibited at workshops or team meetings. These items distract from the learning environment. If such items are found during class time, they will be held by the instructor and returned to the parent at the end of the day.

**For More information regarding e3 Robotics workshops please see the *Parent Information Guide or FAQ's***

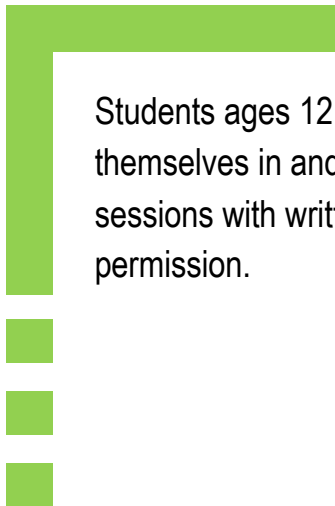

Please sign your child in  
And out of workshop sessions.

Students ages 12 and up may sign  
themselves in and out of workshop  
sessions with written parent  
permission.

Summer Workshops  
Information will be available on line  
by Feb. 1, 2018

### Snack

Short snack breaks are taken  
in workshop sessions.

Snacks are not provided.

## December

### Winter Make and Create—Saturday Dec. 16, 2017; 10:00 AM—12:00 PM

Where you'll power LEDs w/lemons and paint the sky w/light. Do not dare enter w/out your creativity helmet, hand-crafted in your cardboard Maker lab.

Skills Learned:

Make some of our favorite projects, think way outside the box, and discover the science behind fruit-powered circuits, colorful light play, and creative cardboard construction.

#### Level

Introductory; no experience required

**Mechanical, Electrical Engineering**

Hands on activities and experiments

**Time:** Saturday 10 AM—12 PM

**Cost:** \$25.00

### New Year Blast Off! - Saturday Dec. 30, 2017; 10:00 AM—12:00 PM

Light it up

Make many different paper-based projects that light-up in cool and surprising ways, as you learn circuitry basics through crafting with LEDs, copper tape, and coin cell batteries.

YOU'LL GET TO:

- Build a circuit on paper using conductive tape, LEDs, and coin cell batteries.
- Design a light-up project, such as a greeting card.

#### Level

Introductory; no experience required

**Electrical & Mechanical Engineering**

Hands on Activities and experiments

**Robotics**

Hands on Activities and experiments

**Time:** Saturday 10 AM—12 PM

**Cost:** \$25.00

## 2018

### CC Terrific Tuesday's—Jan. 9—Mar. 27; 1:00—3:00 PM

A program designed for families who attend Classical Conversations. Students will learn through hands on activities a variety of introductory engineering concepts as well as participate in the underwater robotics league.

#### Level

Introductory no experience required

**Programming**

**Underwater Robotics**

**Time:** Tuesday, 1—3 PM

Jan. 9—Mar. 27

**Cost:** \$150.00

### Jr. Space Academy— Tuesday, Jan. 9 - Jan. 30; 4:00—5:30 PM

Calling all future Nasa Engineers. In this exciting introduction students will have an opportunity to be introduced to a broad spectrum of science and technology concepts. Academic modules include Unmanned Systems, Lift in Space, Rocket Science, Satellites and their orbits, Fundamentals of Flight, and Planetary Missions—Both human and robotics. Children will learn to: work in a team setting to solve problems systematically and creatively. Expand their knowledge by understanding first-hand what really goes on behind the scenes in rocket science.

#### Level

Introductory no experience required

**Space, Physics, Technology, Flight**

**Time:** Jan. 9—Jan. 30; 4:00—5:30 PM

**Cost:** \$60.00

### Electric Circus—Thursday, Jan. 9 - Jan. 30; 9:00—10:30 AM

Ringmasters in training will be mesmerized and electrified by all they can create with a little bit of power, wires and unusual objects. Explore electricity and circuits through hands-on activities.

#### Level

Introductory no experience required

**Electrical Engineering, Circuits, Electronics**

**Time:** Thurs. Jan. 9—30; 9—10:30 AM

**Cost:** \$60.00

# Ages 6-8

## **Crazy Contraptions—Saturday, January 6—January 27; 9:00—10:30 AM**

Learn how simple machines can be used to create wacky contraptions that set off chain reactions. Students will explore concepts made popular by Rube Goldberg and his machines to explore simple machines, mechanisms, and chain reactions.

### **Level**

Introductory no programming experience required

### **Mechanical Engineering Concepts**

**Time:** Saturday, 9:00—10:30 AM

**Cost:** \$60.00

## **Robot Dig—Tuesday, Feb. 6—Feb. 27; 4:00—5:30 PM**

Roboticians, the World Archaeological Society (WAS) needs you to build a robot to deploy Dig Bots at Archaeological sites in regions of the former Roman Empire. Roboticians will be using LEGO Simple & Motorized Mechanisms to build robots and complete challenges.

### **Level**

Introductory no programming experience required

### **Mechanical Engineering Concepts**

**Time:** Tuesday

**Cost:** \$60.00

## **Oooey Gooley - Saturday, Feb. 3—Feb. 24; 9:00—10:30**

Dress to make a mess! Students will be up to their elbows in slimy, silly, gooey hands on activities as they learn about chemistry and chemical compounds.

### **Level**

Introductory no previous experience required

### **Chemistry and chemical compounds**

**Time:** Saturday, 9:00—10:30 AM

**Cost:** \$60.00

## **Master Builder—Tuesday, March 6—March 27; 4:00—5:30 PM**

Busy Builders will be taught about the physics of building sturdy structures such as buildings, bridges and whatever they can imagine. Students will learn how to use computer aided designing software and how to build from their design.

### **Level**

Introductory no previous experience required

### **Civil Engineering, Technology**

**Time:** Tuesday, 4:00—5:30 PM

**Cost:** \$60.00

## **Jr. Underwater Robotics Team—Thursday, March 8—April 26; 9:00—10:30 AM**

Students work together to design, build, program, test and redesign underwater robots, made of LEGO and other components. Students engage in a series of design challenges or “missions” that gradually increases in complexity and ultimately leads to a fully functional underwater robot fully capable of completing mission challenges at their awards celebration.

### **Level**

Introductory no experience required.

### **Robotics, Technology, Oceanography**

**Time:** Thursday, 9:00—10:30 AM

**Cost:** \$120.00

## **Jr. Underwater Robotics Team—Saturday, March 3—April 21; 9:00—10:30 AM**

Students work together to design, build, program, test and redesign underwater robots, made of LEGO and other components. Students engage in a series of design challenges or “missions” that gradually increases in complexity and ultimately leads to a fully functional underwater robot fully capable of completing mission challenges at their awards celebration.

## December

### Maker Day— Saturday Dec. 16, 2017; 10:00 AM—12:00 PM

Make some of our favorite projects, think way outside the box, and discover the science behind fun engineering projects. Geared to teens.

#### Level

Introductory; no experience required

**Mechanical, Electrical Engineering**

Hands on activities and experiments

**Time:** Saturday 10 AM—12 PM

**Cost:** \$25.00

### Make and Take—Saturday Dec. 30, 2017; 10:00 AM—12:00 PM

*If some is good more is better! A new set of making projects for the curious minded. Projects are geared to teens and their interests. Soldering, electronics and much more.*

#### Level

Introductory; no experience required

**Mechanical, Electrical Engineering**

Hands on activities and experiments

**Time:** Saturday 10 AM—12 PM

**Cost:** \$25.00

## 2018

### Elevate Leadership Program—Tuesday, Jan. 9—Dec. 11, 2018; 6-8 PM

Our 21<sup>st</sup> Century Leadership program is designed to:

- Develop awareness of leadership styles and how to leverage strengths
- Explore decisive conflict resolution tactics
- Learn effective communication strategies
- Understand the power of social media and digital citizenship

Amplify impact by learning how to mobilize peers to achieve common goals

#### Level

Introductory no experience required

**Leadership Development, Communication, Team Building**

**Time:** Tuesday, 6-8 PM

**Cost:** \$300.00

### Elevate Leadership Program—Thursday, Jan. 11—Dec. 13, 2018; 6-8 PM

Our 21<sup>st</sup> Century Leadership program is designed to:

- Develop awareness of leadership styles and how to leverage strengths
- Explore decisive conflict resolution tactics
- Learn effective communication strategies
- Understand the power of social media and digital citizenship

Amplify impact by learning how to mobilize peers to achieve common goals

#### Level

Introductory no experience required

**Leadership Development, Communication, Team Building**

**Time:** Thursday, 6-8 PM

**Cost:** \$300.00

### Explode the Code—Wednesday, Jan. 10—Feb. 28; 1:00—2:30

Computer science class in which students use Scratch in the first few hours to understand the basic Computer Science fundamentals (sequencing, looping, branching and variables) and then move onto learning Python (Functional Programming). Students will assemble and create a Raspberry pi project. Using the python, and electronics knowledge gained in prior sessions. Students can bring their own Raspberry Pi Kit, pay the Lab fee or purchase one through Amazon.

#### Level

Introductory no experience required

**Technology, Programming, Electronics**

**Time:**

**Cost:** \$120.00

Lab Fee: \$69.99

# Ages 11-14

## **Competitive Chess Team—Saturday, Jan. 6—May 12; 11:30—1:30**

Chess is a valuable educational tool that helps teach important lessons including problem-solving, critical thinking, sportsmanship, patience and goal setting -- plus, it is fun! Introduce chess to students in a way that strategically introduces the basics first, so that students quickly learn to play a legal game of chess; Facilitate progressive growth through the sequential introduction of increasingly complex skills; Provide students, and parents, course goals and expectations; Provide framework to measure student results Levels are designed so that a typical third grade student could complete a Level within 10-15, one-hour classes.

### **Level**

Self Pacing

**Strategy, Critical Thinking,  
Sportsmanship, Problem-Solving**

**Time:** Saturday, 11:30—1:30

**Cost:** \$150.00

---

## **Underwater Robotics Team—Wednesday, Jan. 9—April 25; 1:00—4:00 PM**

Students work together to design, build, program, test and redesign underwater robots. Students engage in a series of design challenges or “missions” that gradually increases in complexity and ultimately leads to a fully functional underwater robot fully capable of completing mission challenges at the Regional Tournament.

### **Level Scout**

Introductory; no experience required

**Electrical & Mechanical Engineering  
Robotics,**

**Time:** Wednesday, 1—4:00 PM

**Cost:** \$250.00

---

## **Underwater Robotics Team—Saturday, Jan. 6—April 21; 2:00—5:00 PM**

Students work together to design, build, program, test and redesign underwater robots. Students engage in a series of design challenges or “missions” that gradually increases in complexity and ultimately leads to a fully functional underwater robot fully capable of completing mission challenges at the Regional Tournament.

### **Level Scout**

Introductory; no experience required

**Electrical & Mechanical Engineering  
Robotics,**

**Time:** Saturday, 2:00—5:00 PM

**Cost:** \$250.00

# Age | 4-17

# STEM CENTRAL

## December

### Maker Day—Saturday Dec. 16, 2017; 10:00 AM—12:00 PM

Make some of our favorite projects, think way outside the box, and discover the science behind fun engineering projects. Geared to teens.

#### Level

Introductory; no experience required

**Mechanical, Electrical Engineering**

Hands on activities and experiments

**Time:** Saturday 10 AM—12 PM

**Cost:** \$25.00

### Make and Take Saturday Dec. 30, 2017; 10:00 AM—12:00 PM

*If some is good more is better! A new set of making projects for the curious minded. Projects are geared to teens and their interests. Soldering, electronics and much more.*

#### Level

Introductory; no experience required

**Mechanical, Electrical Engineering**

Hands on activities and experiments

**Time:** Saturday 10 AM—12 PM

**Cost:** \$25.00

## 2018

### Elevate Leadership Program—Tuesday, Jan. 9—Dec. 11, 2018; 6-8 PM

Our 21<sup>st</sup> Century Leadership program is designed to:

- Develop awareness of leadership styles and how to leverage strengths
- Explore decisive conflict resolution tactics
- Learn effective communication strategies
- Understand the power of social media and digital citizenship

Amplify impact by learning how to mobilize peers to achieve common goals

#### Level

Introductory no experience required

**Leadership Development, Communication, Team Building**

**Time:** Tuesday, 6-8 PM

**Cost:** \$300.00

### Elevate Leadership Program—Thursday, Jan. 11—Dec. 13, 2018; 6-8 PM

Our 21<sup>st</sup> Century Leadership program is designed to:

- Develop awareness of leadership styles and how to leverage strengths
- Explore decisive conflict resolution tactics
- Learn effective communication strategies
- Understand the power of social media and digital citizenship

Amplify impact by learning how to mobilize peers to achieve common goals
