AGGRESSIVE MANAGED ACCOUNT PORTFOLIO (MAP)

Investment Objective and Strategy

The Aggressive MAP focuses entirely on growth and is suited for investors with a high risk tolerance and a long time horizon. The fund's weighting in fixed income is designed to dampen some volatility and to protect in down markets, but the objective is to provide maximum growth. The Aggressive MAP Benchmark consists of 61 percent Russell 3000, 29 percent MSCI ACWI Ex USA, and 10 percent Bloomberg U.S. Aggregate Bond Index.

Diversification

The MAP holds an array of investments designed to minimize risk and generate return across a range of market conditions.

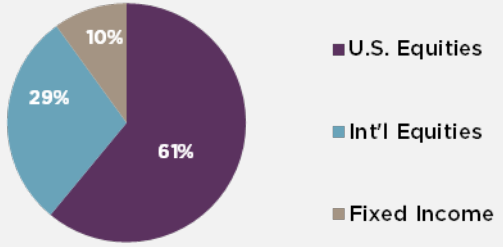

Rebalancing

The MAP is monitored daily and trued up to its risk target as needed to help it meet its intended investment objective.

Cost Efficiency

Cost savings generated by the MAP's collective purchasing power are passed directly to plan participants.

Fund Commentary

The Managed Account Portfolios (MAPs) maintained their positioning in the domestic equity space relative to the benchmark. Minimizing the short-term risk amid ongoing volatility and a broad range of potential market outcomes remains the priority.

In U.S. equities, the MAPs are allocated to the Diversified U.S. Large-Cap Stock CIT and the Diversified U.S. Small- and Mid-Cap CIT. Both portfolios include allocations to value, blend, and growth strategies within large-, mid-, and small-cap U.S. equities.

Within international equities, the MAPs invest in the Diversified International Equity CIT. This fund is predominantly invested in international developed market stocks and maintains dedicated exposure to emerging market stocks.

Within fixed income, the MAPs invest in the Diversified Fixed Income CIT. This portfolio mixes intermediate core and intermediate core-plus bond strategies.

The Aggressive MAP returned -0.34 percent for the quarter, underperforming its benchmark by 1.01 percent and outperforming its peers by 0.53 percent.

Benchmark underperformance is attributable to manager selection in U.S. and international equities. Fidelity Small Cap Growth, EARNEST Partners Smid Cap Value, BlackRock Russell 2000 Index Fund, and EAFE Equity Index Fund were the largest detractors, all lagging their respective benchmarks. Boston Partners International Equity and Harbor Capital Appreciation were the largest contributors; both funds outperformed their respective benchmarks.

Please see IMPORTANT DISCLOSURES regarding the MAPs offered in your retirement plan contained in the following pages. These risk-based portfolios are designed to actively control the investment mix by diversifying across very distinct asset classes. Opinions expressed as commentary are subject to change without notice. For more information, click here or contact Great Gray at 866.427.6885 with any questions.

Important Disclosures – Managed Account Portfolios (MAPs)

The Managed Account Portfolios (MAPS or the Funds) accept investments from participants through (1) employee benefit plans (Plans) that qualify for exemption from federal income tax pursuant to Sections 401(a) and 501(a) of the Internal Revenue Code of 1986, as amended (the Code); (2) Plans that are maintained by a governmental employer under Section 414(d) of the Code; and (3) group trusts that consist solely of assets of the foregoing types of Plans. An investment in the Funds can be made only if all requirements for participation are met and the investment is authorized by the Plan's sponsor or other named fiduciary with authority to direct Plan investments. For a Plan to invest in the Funds, an eligible Plan must complete and return all necessary participation materials and other required documentation to the trustee (or its authorized representative) and specifically authorize and direct the investment of assets in the Funds. If at any time the trustee determines that the Plan is no longer eligible for participation in the Funds, the Plan's investment in the Funds will be withdrawn promptly and returned to the Plan.

Management of the Funds

Trustee: Great Gray Trust Company (the Trustee) serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and investments made, in the Fund. The Fund is part of the Great Gray Trust Collective Investment Trust (the Trust) operated by the Trustee. The Funds are not mutual funds. The Funds are "group trusts" within the meaning of Internal Revenue Service Revenue Ruling 81-100, as amended, and are collective investment trusts that are exempt from registration under the Investment Company Act of 1940. The decision to invest in the Funds should be carefully considered.

Great Gray Trust Company and its Great Gray Trust affiliates (Great Gray) provide collective investment trusts (CITs) committed to expanding and evolving in the retirement space. Their fiduciary heritage is the cornerstone for designing and implementing dynamic, value-driven solutions for clients and participants. Great Gray has offices in Massachusetts, Delaware, and Nevada. Great Gray is owned by Madison Dearborn Partners, LLC (MDP). MDP is a private equity firm based in Chicago.

Great Gray Trust Company, LLC Collective Investment Funds (Great Gray Funds) are bank collective investment funds; they are not mutual funds. Great Gray Trust Company, LLC serves as the Trustee of the Great Gray Funds and maintains ultimate fiduciary authority over the management of, and investments made in, the Great Gray Funds. Great Gray Funds and their units are exempt from registration under the Investment Company Act of 1940 and the Securities Act of 1933, respectively. Investments in the Great Gray Funds are not bank deposits or obligations of and are not insured or guaranteed by Great Gray Trust Company, LLC, any other bank, the FDIC, the Federal Reserve, or any other governmental agency. The Great Gray Funds are commingled investment vehicles, and as such, the values of the underlying investments will rise and fall according to market activity; it is possible to lose money by investing in the Great Gray Funds.

Participation in collective investment trust funds is limited primarily to qualified retirement plans and certain state or local government plans and is not available to IRAs, health and welfare plans, and, in certain cases, Keogh (H.R. 10) plans. Collective investment trust funds may be suitable investments for participants seeking to construct a well-diversified retirement savings program. Investors should carefully consider the investment objectives, risks, charges, and expenses of any pooled investment company before investing. The Additional Fund Information and Principal Risk Definitions (PRD) document contains this and other information about a collective investment trust fund and is available by clicking here. Or request a copy by contacting Great Gray Trust Company, LLC at 866.427.6885.

Great Gray Trust is a registered service mark used in connection with various fiduciary and nonfiduciary services offered by Great Gray Trust Company and certain other subsidiaries of MDP.

Subadvisor: The Trustee has engaged CAPTRUST Financial Advisors (the Subadvisor) to act as the subadvisor to the Funds. In this capacity, CAPTRUST will provide investment advice and recommendations with respect to the investment of Fund assets.

Benchmark Definition: We use benchmarks for comparison purposes. A benchmark is designed to serve as a yardstick of comparison with an investment. The three standard benchmarks are absolute goal, market index, and universe or peer group comparison. Peer groups are Morningstar asset-allocation categories used to group comparable strategies, selected to align with each MAP's risk profile. Fund rankings indicate how each fund has performed relative to the respective peer group, which has similar investment objectives and characteristics.

Fees and Expenses

The participant will incur management fees, Trustee fees, and other operating expenses related to the Funds. Other operating expenses may include, but are not limited to, audit expenses, custody service fees, tax form preparation expenses, and legal and other fees. A portion of those fees may be paid by the Trustee to the Funds' Subadvisor for its subadvisory services to the Funds.

Participants in the Funds will also incur expenses from the Underlying Funds, which include management fees, audit fees, Trustee fees, and other expenses in relation to the management of the Underlying Funds. The Underlying Fund fees and expenses are expensed directly to the Underlying Funds and are not charged directly to participants in the Funds. They are not direct costs paid by participants and are not used to calculate the Funds' net asset value. They have no impact on the costs associated with Fund operations.

Below is a breakdown of the fees on the Funds (as of September 30, 2026):

	Aggressive MAP
Underlying Fund Fees & Expenses	0.21%
Trustee Fees	0.055%
Other Expenses	0.005%
Expense Ratio	0.27%

Other Expenses are based on estimated amounts for the current fiscal year. Fees and expenses are only one of several factors that participants and beneficiaries should consider when making investment decisions.

Expense Reimbursement includes any 12(b)-1 or sub-transfer agency revenues paid to the Trustee based upon ownership of the Underlying Funds. These revenues are used to offset fees paid by the Funds. The amount shown is an estimate for the current fiscal year.

Advisory Fees

CAPTRUST Financial Advisors earns investment advisory fees, which are disclosed in its Disclosure Brochure (available at Important Disclosures | CAPTRUST) and documented in a Retirement Plan Advisory Agreement between CAPTRUST and the Plan sponsor.
For more information, visit the Employee Benefit Security Administration's website at Understanding Your Retirement Plan Fees | U.S. Department of Labor (dol.gov) for an example demonstrating the long-term effect of fees and expenses.

In some cases, CAPTRUST's fee is paid by the Plan sponsor out of corporate assets, but frequently, CAPTRUST's investment advisory fee is paid out of Plan assets.

Who pays investment advisory fees is determined by your Plan's sponsor.

For small plans, it is common for each Plan participant to pay a prorated portion of the advisory fee. In that case, actual investment returns experienced by Plan participants will be reduced by investment advisory fees and other expenses that may be incurred in the management of your account. The cumulative effect of fees and expenses can substantially reduce the growth of a participant's or beneficiary's retirement account. As an example, the effect of investment advisory (or management) fees on the total value of a participant's portfolio assuming (1) $10,000 investment, (2) a portfolio return of 5 percent a year, and (3) 1 percent annual investment advisory fee would be $105 in the first year, with a cumulative effect of $568 over five years. Actual investment advisory fees paid by clients may vary.

For more information, visit the Employee Benefit Security Administration's website (at https://www.dol.gov/sites/dolgov/files/EBSA/about-ebsa/our-activities/resource-center/publications/a-look-at-401k-plan-fees.pdf) for an example demonstrating the long-term effect of fees and expenses.

Bloomberg Commodity Index: Measures the performance of a diversified basket of commodities through futures contracts. It spans major sectors and uses a systematic, liquidity- and production-based weighting process while rolling contracts to maintain continuous exposure.

Bloomberg U.S. Aggregate Index: Measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage pass through securities, commercial mortgage backed securities and asset backed securities that are publicly for sale in the United States.

Dow Jones U.S. Real Estate Index: Measures the performance of U.S. real estate investment trusts (REITs) and other companies involved in real estate development, management, or ownership. It is a float-adjusted, market-capitalization-weighted index that reflects the performance of publicly traded U.S. real estate securities.

FTSE NAREIT All Equity REITs TR USD Index: Measures the performance of all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property that also meet minimum size and liquidity criteria. A REIT is a company that owns, and in most cases, operates income-producing real estate.

MSCI EAFE Index: Measures the performance of the large- and mid-cap equity market across 21 developed markets around the world, excluding the U.S. and Canada. It is a free float-adjusted market-capitalization weighted index and includes the reinvestment of dividends into the index.

MSCI Emerging Markets Index: Measures the performance of large- and mid-cap equities across emerging market countries. It is a free float-adjusted, market-capitalization-weighted index covering about 85% of each included market's equity universe and incorporates the reinvestment of dividends

Merrill Lynch 3-Month Treasury Bill: Measures the performance of a single issue of outstanding treasury bill that matures closest to, but not beyond, three months from the rebalancing date. The issue is purchased at the beginning of the month and held for a full month; at the end of the month that issue is sold and rolled into a newly selected issue.

Russell 1000® Index: Measures the performance of the large-cap segment of the U.S. equity universe. The Russell 1000® Index is a subset of the Russell 3000® Index which is designed to represent approximately 98% of the investable U.S. equity market. It includes approximately 1,000 of the largest securities based on a combination of their market cap and current index membership.

Russell Mid-Cap® Growth Index: Measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Mid-cap Index companies with relatively higher price-to-book ratios, higher I/B/E/S forecast medium term (2 year) growth and higher sales per share historical growth (5 years).

Russell Mid-Cap® Value Index: Measures the performance of the mid-cap value segment of the U.S. equity universe. It includes those Russell Mid-cap Index companies with relatively lower price-to-book ratios, lower I/B/E/S forecast medium term (2 year) growth and lower sales per share historical growth (5 years).

Russell 1000® Value Index: Measures the performance of the large cap value segment of the U.S. equity universe. It includes the Russell 1000 companies with relatively lower price-to-book ratios, lower forecast medium term (2 year) growth and lower sales per share historical growth (5 years).

Russell 1000® Growth Index: Measures the performance of the large cap growth segment of U.S. equities. It includes the Russell 1000 companies with relatively higher price-to-book ratios, higher forecast medium term (2 year) growth and higher sales per share historical growth (5 years).

Russell 2000® Index: Measures the performance of the 2,000 smallest companies in the Russell 3000® Index. It is a market-capitalization weighted index.

Russell 2000® Value Index: Measures the performance of the small cap value segment of U.S. equities. It includes the Russell 2000 companies with relatively lower price-to-book ratios, lower forecast medium term (2 year) growth and lower sales per share historical growth (5 years).

Russell 2000® Growth Index: Measures the performance of the small cap growth segment of U.S. equities. It includes those Russell 2000 companies with relatively higher price-to-book ratios, higher forecast medium term (2 year) growth and higher sales per share historical growth (5 years).

Russell 3000® Index: Measures the performance of the largest 3,000 U.S. companies designed to represent approximately 98% of the investable U.S. equity market.

S&P 500® Index: Measures the performance of 500 leading publicly traded U.S. companies from a broad range of industries. It is a float-adjusted market-capitalization weighted index.
